

Accounts Payable and purchasing automation for Education

Make your budget stretch further

Compleat delivers five primary benefits to all schools, academies and multi-academy trusts:

- 1 Automation of purchasing saves everyone involved a huge amount of time
- 2 Finance gain real time overview and control of purchasing and budget management
- 3 Senior management and budget holders track all spend data and budget availability in real time
- 4 Compleat helps you identify and enable significant savings year-on-year for what you already buy
- 5 These savings usually exceed the cost of our solutions making a real difference

Compleat applies AI and machine learning to reduce our costs and make our services affordable to every school, irrespective of size.

How?

Compleat SaaS applications extend the functionality of your existing accounting / ERP application through tight integration, to automate the supplier invoice capture, approval and wider purchasing processes. Our software is designed to be easy to use for everyone outside Finance.

We tightly integrate with familiar online suppliers like Amazon Business, YPO and many more supplier websites to make the buying process so simple and easy that everyone enjoys using it.

With your permission, our procurement services can utilise the supplier invoice data we capture to identify savings, secure lower prices and where relevant, provide online purchasing to deliver those savings. The larger the spend, the greater the savings we can achieve.

One size does not fit all

Our invoice capture, procurement applications and services are available to every customer, but we offer two different AP and purchasing automation applications that use these applications to meet your requirements and available budget.

iCompleat Buy to Pay

iCompleat is affordable for every school, available on monthly subscription, including a one-month free trial and is designed to be deployed, integrated to your accounting software and configured for your school, usually going live in less than one day.

iCompleat is most popular in trusts consisting of 1-4 schools .

eCompleat Procure to Pay

eCompleat is available on annual subscription and offers a greater depth and breadth of functionality with additional modules to meet the most sophisticated requirements.

eCompleat is popular with schools in both the private and public sector, with trusts ranging from 4 to 50+ schools.
