

eCompleatInvoice

Purchase invoice automation

eCompleatInvoice is an invoice capture, tracking and approval processing application. It helps accounts payable and finance teams simplify and control invoice management by accelerating the invoice approvals process with budget holders, and by giving them full visibility on the invoice life cycle. It extends the capabilities of your existing accounting or ERP software through tight integration.

Your benefits

Automate accounts payable and remove all paper - instantly and forever.

Full visibility of the status of every invoice for everyone who needs to know – in real time!

Finance teams can more accurately forecast and manage cash flow with a much faster month-end close. Budget holders gain full visibility of their spend with every supplier, every current and historic transaction, and their available budget.

Fast invoice approvals from any device

Speed up your invoice approvals with our mobile apps for Microsoft, Android and Apple. They also enable approvers to review the image of the invoice, check general ledger analysis and approve or deny invoices 24x7 from any location.

Cut data entry and help your people work smarter

With fully automated invoice capture, accounts payable teams no longer need to type in all invoice information. This reduces the risk of errors and save time from filing, printing and searching invoices.

Go paperless from day one

There are no commercial or legal reasons to retain a paper-based accounts payable process. Going paperless means time saved, better environmental practices and reduced costs.

Features & capabilities

Scalability

Invoice capture and approval automation makes removing paper simple and fast whether you process 1,000 invoices or 250,000+ per year.

Support all invoice formats

We capture all invoice formats, including EDI, XML data, PDF, text, Word, Excel, OCR import and scanned paper invoices.

Replace OCR technology

We are replacing existing OCR solutions to save you time and resources. Our technology is considerably faster and cheaper than these legacy technologies.

Comprehensive document management

All invoices are captured and tracked, and accessible from any connected device with a full audit trail. The process is fully compliant with HMRC/VAT regulations.

Add eCompleatOrder

Simple and fast purchase order creation and approvals enables the automated capture and matching of every invoice to orders, ensuring the right price is paid for every purchase.

Get the COMPLEAT advantage

We offer a powerful modular software suite specifically designed to overcome financial and budget management challenges that totally transforms corporate spend management.

Modular design

Each Compleat module can be deployed independently. Available in the cloud or on-premise.

Integration

Simple integration with your existing accounting/ERP software. We extend the capabilities of your existing ERP using our out-of-the-box connectors - included in the price of our software.

Mobile

Information at your fingertips, from any connected device. Information is power and instant access creates more effective people that make smarter, better-informed decisions.

Dashboard and reporting

Get the full view of spend during transaction entry and analyse trends and variances with pre-defined reports and dashboards.

Document management

The next generation of document management, including sophisticated search of all digital resources for every user.

Security

Users are allocated a security profile that controls access, ensuring everyone only has access to the appropriate information and processes.

COMPLEAT

Compleat Software is a leading provider of smart spend software available for businesses of all sizes. This powerful, modular software empowers businesses to eliminate paper, unite finance, procurement and budget holders and gain an accurate, real-time view of company finances and budget availability. Offering the next generation of purchasing and budget management automation at an affordable cost, this purchase to pay software delivers a single seamless, paperless process that incorporates e-invoicing, purchase invoice approval, purchase order and receipting, employee expenses, contract management with comprehensive dashboards and reporting for every user.
