eCompleatP2P

Purchase-to-pay automation

eCompleatP2P (purchase to pay) combines the automation of order creation and invoice automation to revolutionise the entire purchasing process for finance, budget holders and procurement. It delivers a single holistic real-time view of every supplier, current and historic transaction and the exact status of budget availability to improve financial management and spend control.

Your benefits

Automate purchase-to-pay processes to improve the management of corporate spend.

Control spend as it happen

CompleatP2P delivers total real-time oversight of every planned and committed purchase in play to everyone who needs to know and fully automates the capture of the invoice undertaking a "2-way" and "3-way" match without user intervention.

Automate, accelerate and simplify the entire purchasing process – with zero paper

Remove all of the paper from the entire purchasing process at the outset. This solution delivers the real-time status of every transaction (including payment status) and budget availability to everyone who needs to know, to put the entire business on the same page.

Replace out-of-date month-end management reports with real-time information

Enable your budget holders to significantly improve their financial management skills, improve their financial planning to ensure they maximise the value of all of their corporate spend.

Gain total visibility of future cash requirements

The real-time view of commitments and accruals also enables much faster month-end closes to speed up the delivery of monthly management reports.

Features & capabilities

Fully automated invoice capture and approvals

eCompleatP2P automatically captures and reconciles the invoice against orders and receipting, with a 3-way match being approved and posted to your accounting software or ERP with zero touch.
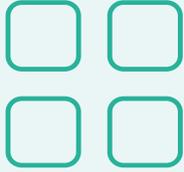

Project, budget and supplier management

Budget holders are provided with an overview of supplier, budget and project information. They can create their own projects, associated budgets and future spend timeline, then track the actual spend against them, replacing the need for spreadsheets and delivering finance an overview of future planned spend. This is the next generation of spend management.

Procurement oversight and control

eCompleatP2P delivers all of the tools procurement requires to maximise the effectiveness of corporate spend. The procurement workbench, supplier and catalogue lockdown ensure the business always conforms to procurement best practice, delivering best value while tracking the saving achieved.
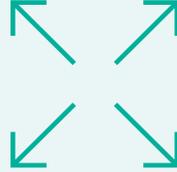

eCOMPLEAT

Get the COMPLEAT advantage

We offer a powerful modular software suite specifically designed to overcome financial and budget management challenges that totally transforms corporate spend management.
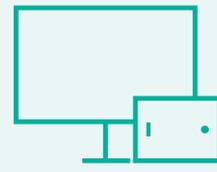

Modular design

Each Compleat module can be deployed independently. Available in the cloud or on-premise.

Integration

Simple integration with your existing accounting/ERP software. We extend the capabilities of your existing ERP using our out-of-the-box connectors - included in the price of our software.

Mobile

Information at your fingertips, from any connected device. Information is power and instant access creates more effective people that make smarter, better-informed decisions.

Dashboard and reporting

Get the full view of spend during transaction entry and analyse trends and variances with pre-defined reports and dashboards.

Document management

The next generation of document management, including sophisticated search of all digital resources for every user.

Security

Users are allocated a security profile that controls access, ensuring everyone only has access to the appropriate information and processes.
