eCompleatWork

Work order automation

eCompleatWork is an electronic Work Order management solution that enables procurement professionals and buyers to manage a large volume of work orders and meet fulfilment objectives. Users can therefore better manage order allocations and new product deployments throughout the supply chain as an extension of your current ERP system.

Your benefits

Automate the process of order management for faster order processing cycles and cost-effecting sourcing.

Achieve optimised fulfilment and rapid order processing

With eCompleatWork, businesses benefit from cost-effective sourcing of inventory to work orders lowering operating costs and promoting operational efficiencies that increase profitability.

Save time processing orders

With easy-to-use features and real-time capabilities, professionals can save a huge amount of time when needed to process orders.

Easily update work order status and sub-status

Enable your budget holders to significantly improve their financial management skills, improve their financial planning to ensure they maximise the value of all of their corporate spend.

Improve collaboration on work orders cross-functionally through increased visibility

Create, maintain and manage the important data contained in work orders that can be shared and viewed across teams of field workers. This increased visibility empowers teams to know exactly what's required to successfully execute and close the work order, taking into account the customer's preferences and the availability of resources.

Features & capabilities

Leverage smart and modern automation applications to maximise the time and capabilities of your people.

View work order details on one screen

All the important data contained in a work order can be viewed quickly on a single screen.
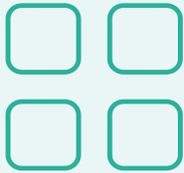

Data duplication elimination

Since eCompleatWork fully integrates with external CRM or ERP systems, it eliminates the likelihood of data duplications.

Access controls

User access and visibility can be limited to the relevant objects.
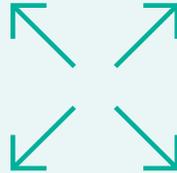

eCOMPLEAT

Get the COMPLEAT advantage

We offer a powerful modular software suite specifically designed to overcome financial and budget management challenges that totally transforms corporate spend management.
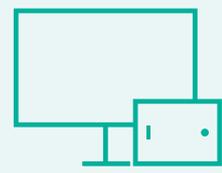

Modular design

Each Compleat module can be deployed independently. Available in the cloud or on-premise.

Integration

Simple integration with your existing accounting/ERP software. We extend the capabilities of your existing ERP using our out-of-the-box connectors - included in the price of our software.

Mobile

Information at your fingertips, from any connected device. Information is power and instant access creates more effective people that make smarter, better-informed decisions.

Dashboard and reporting

Get the full view of spend during transaction entry and analyse trends and variances with pre-defined reports and dashboards.

Document management

The next generation of document management, including sophisticated search of all digital resources for every user.

Security

Users are allocated a security profile that controls access, ensuring everyone only has access to the appropriate information and processes.

COMPLEAT
